RESALE OF COMMUNICATIONS COMMON CARRIER SERVICE

SECTION 3 - DESCRIPTION OF SERVICE AND RATES

3.1 Timing of Calls

The customer's monthly usage charges for Carrier service are based upon the total number of minutes the customer uses and service options subscribed to. Chargeable time begins when the connection is established between the calling station and the called station or PBX. Chargeable time ends when the either party "hangs up." However, if the called station "hangs up" but the calling station does not, chargeable time will end when the connection is released by automatic timing equipment within the telecommunications network.

There are no charges incurred if a call is not completed.

3.2 Start of Billing

For billing purposes, the start of service is the first day on which service is provided to the customer. The end of service date is the last day or any portion thereof that service is provided to the customer.

3.3 Interconnection

Service furnished by Carrier may be interconnected with services or facilities of other authorized communications common carriers and with private systems, subject to the technical limitations established by Carrier. Service furnished by Carrier is not part of a joint undertaking with such other carriers. Any special interface equipment of Carrier and other participating carriers shall be provided at the customer's expense.

Interconnection with the facilities or services of other carriers shall be under the applicable terms and conditions of the other carriers' tariff. The customer is responsible for taking all necessary legal steps for interconnecting his customer-provided terminal equipment or communications systems with Carrier's. The customer shall secure all licenses, permits, right-of-ways, and other arrangements necessary for such interconnection.

RESALE OF COMMUNICATIONS COMMON CARRIER SERVICE

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.4 Terminal Equipment

Carrier's service may be used with or terminated in customer provided terminal equipment or customer provided communication systems, such as teleprinters, handsets, or data sets. Such terminal equipment shall be furnished and maintained at the expense of the customer. The customer is responsible for all costs at his premises, including customer personnel, wiring, electrical power, and the like incurred in his use of Carrier's service.

If the customer fails to maintain and operate his terminal equipment properly, resulting in the occurrence or possibility of harm to Carrier's equipment or personnel, or impairment to the quality of service to other customers, Carrier may, upon written notice, require the use of protective equipment at the customer's expense. If this fails to produce satisfactory quality and safety of service, Carrier may terminate the customer's service.

3.5 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The company uses the rate centers and associated vertical and horizontal coordinates that are generally accepted within the telecommunications industry.

Formula: $\sqrt{(V1 - V2)^2 + (H1 - H2)^2}$
√ 10

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.6 Minimum Call Completion Rate

The customer can expect a call completion rate of 97% of calls attempted during peak use periods.

3.7 Special Services

For purposes of this tariff, a Special Service is deemed to be service requested by the customer for which there is no prescribed rate in this tariff. Special Services charges will be developed on an individual case basis and filed in this tariff.

Special Service charges will be based on the estimated cost of furnishing such services including the cost of operating and maintaining such a service, the cost of equipment and materials used in providing such a service, the cost of installation including engineering, labor supervision, transportation, and the cost of any other specific item associated with the particular Special Service request.
